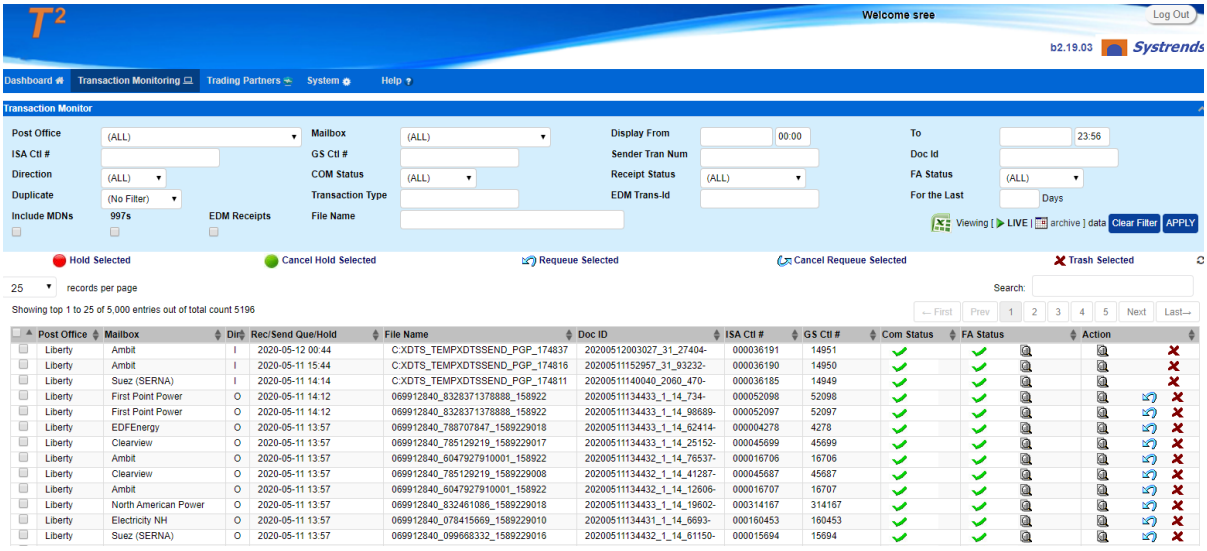
T²Billing

Manage and integrate your customer information and billing



T²Billing is a complete customer information system solution. It is designed to handle all of your complex billing and data management needs. Developed to provide the retail energy marketer with a cost-effective solution for implementing a system with “speed-to-market” as its primary focus.

T²Billing features include:

- Bill-Ready, Rate-Ready, and Supplier-Consolidated billing
- Summary and Dual Billing Options
- Customized Billing Solution
- Cost effective transaction automation and integration
- Flexible for small or large customer base
- Integration with Systrends T²Enterprise, EDI application
- Easy pricing updates
- Search and navigation features
- Online audit trail for all transactions
- Automatic transaction routing based on approvals

Systrends **T²Billing** is a part of our comprehensive **T²Enterprise** data integration product.

Let T²Enterprise take your organization’s EDI management to the next power
