

T²Com

Manage your data in one place to reduce the effort and cost.

T²Com is a business-to-business and system-to-system data communication tool designed for multiple data streams. This gateway solution provides transport and monitoring for your in-house communication and trading partner feeds. **T²Com** manages your incoming and outgoing data from multiple sources using energy industry and universal market transport standards, such as AS2.

Developed originally as Systemtrends core product, **T²Com** has helped market players for over 15 years. Systemtrends **T²Com** can be used as a standalone solution or as an add-on to our comprehensive **T²Enterprise** data integration product line.

Businesses today require solutions that are flexible and allow data communication to be auditable and manageable. **T²Com** minimizes effort, risk, and the potential for costly errors by standardizing connections. Managing your data with **T²Com** can prevent the costly consequences of lost data, including fines, delays, damage control, performance gaps, and payment delays. Systemtrends has helped over 200 companies in the energy industry automate, track, and transform their data. How can we help you?

Save time, money, and reduce the potential of manual errors.

T²Com features include:

- Secure transport and communication of data (EDI, XML, proprietary, etc.) within your organization and between you and your trading partners
- Transport administration via various communication protocols (AS2, NAESB, FTP, etc.)
- Error tracking management and notification (Functional Acknowledgement generation and reconciliation)
- Transaction monitoring with acknowledgement tracking and delinquent alerts
- Customized scalability for your data communication

T²Enterprise, our premier data integration product, includes **T²Mapper** (provides system data integration for complex data streams), **T²Tran** (validates, stores, alerts, and reports all transactions), **T²App** (provides delivery of data to mobile devices), and **T²Com**. **T²Enterprise** is a comprehensive end-to-end solution for any organization that wants to manage, track, store, and distribute its data.

Let T²Enterprise take your organization's transaction management to the next power.
