

eFINForms (XBRL)

Create, Manage, and File FERC XBRL Forms

Systrends **eFINForms** provides an easy-to-use solution for creating, validating, tagging, and submitting XBRL formatted financial data to FERC.

No matter the size of the company or number of affiliates, Systrends eFINForms is the ideal, feature-rich, application that generates and tracks multiple quarterly and yearly filings.

eFINForms features include:

- Web-based application with the look and feel of the former Fox Pro software
- Roll-Forward function creates the next quarterly/yearly filing and populates known data
- Auto-calculation of column totals
- Full Validation of FERC requirements and Taxonomy formulas
- Easy footnotes creation with Word upload
- Population of entire spreadsheet schedule with one excel upload
- Export data function and pre-populated templates
- Direct submission to FERC
- Multi-level approval process
- Individual schedule status to make each page status clear to all users

Systrends is committed to meeting all its FERC filing customers needs and strives to provide the best in class XBRL software.
