

eFileEQR

Create, Manage, and File FERC Electric Quarterly Reports

Systrends **eFileEQR** provides an easy-to-use EQR Filing solution for creating, validating and submitting XML formatted data to FERC.

No matter the size of the EQR data or number of affiliates, Systrends eFileEQR is the ideal, feature-rich, application that efficiently generates and tracks multiple quarterly filings.

eFileEQR features include:

- Full validation check based on FERC requirements
- Automatic status update, Confirmation emails, and submission timestamp
- Actionable color-coded validation report that highlights warnings and errors
- Direct submission to FERC
- History of past warnings and errors to help with resubmissions
- Data export of current or previous quarterly filings
- Multi-user and multi-company capability
- Excel or CSV uploading
- Detailed reporting on contracts and transaction data
- Supports XBRL format to handle FERC future requirement change

Systrends is committed to meeting all its FERC filing customer needs and strives to provide the best-in-class EQR software.

Let **eFileEQR** guide you through the quarterly filing process
