

# T<sup>2</sup>Com

Exchange data reliably and securely with trading partners

**T<sup>2</sup>Com** is a business-to-business and system-to-system data communication tool designed for multiple data streams. This gateway solution provides transport and monitoring for your in-house and trading partner data communications.

**T<sup>2</sup>Com** features include:

- EDI management, security and validation
- Standardized (EDI, XML, ebXML, XBRL, etc.) and proprietary data communication
- Secure transport protocols (ASx, NAESB, sFTP, etc.)
- Error tracking management
- Transaction monitoring, acknowledgement tracking, reconciliation and delinquency alerts
- Seamless market integration and smart grid data exchange

Systrends **T<sup>2</sup>Com** is a part of our comprehensive **T<sup>2</sup>Enterprise** data integration product.

Let **T<sup>2</sup>Enterprise** take your organization's EDI management to the next power
