

T²Tran

Store, transform and analyze transaction data

T²Tran offers the ability to store, analyze, report, validate, and archive data. This database solution transforms and stores data from proprietary systems so it can be easily used for reporting or redistribution to other data sources.

T²Tran features include:

- EDI management, security and validation
- Data storage and warehousing of all historical data
- Business process controls and integration functions
- Transaction transformation and mapping to a transactional database
- Flexible for small or large customer base
- Transaction monitoring with acknowledgement tracking and delinquent alert
- Any-to-Any mapping (EDI, XML, ebXML, XBRL, Flat files, Database)

Systrends **T²Tran** is a part of our comprehensive **T²Enterprise** data integration product.

Let T²Enterprise take your organization's EDI management to the next power
