

# eMBRdata (Order 860)

Create, Manage, and File FERC 860 Data

Systrends eMBRdata provides an easy-to-use Order 860 filing solution for creating, validating, and auto-populating FERC XML formatted data.

No matter the size of the company or number of affiliates, Systrends eMBRdata is the ideal, feature-rich, application that efficiently generates and tracks multiple filings.

**eMBRdata** features include:

- Easy to use web-based application
- Use of a proprietary template to gather and upload all your required data at once
- Full Validation of FERC requirements
- Direct connection to FERC database to track and retrieve previously submitted data
- Auto-population of FERC reference IDs that change with every submission
- User role permissions for different level access
- Exporting of data and templates
- Direct submission to FERC
- Automatic status updates, based on FERC acceptance
- Viewing of FERC validation errors in the application

Systrends is committed to meeting all its FERC filing customer needs and strives to provide the best-in-class MBR (Order 860) software.

**Let eMBRdata guide you through the Order 860 filing process**
