# T²App

Manage and Deliver Information from Various System Sources to Any Mobile Device.

T²App is a data management and distribution tool for mobile devices such as phones or tablets (iPads, Playbooks, Androids, etc.). **T²App** supplies a set of APIs that use web services to distribute information from your secure systems to various devices. This distribution solution provides transport and management functions that deliver data to devices within your organization or to external users. **T²App** manages outgoing data so you can provide it to anyone who needs it, regardless of what tool or device they use to access information.

Developed to provide increased knowledge access to our clients, **T²App** is a tool for delivering data to various devices; it offers a manageable way to direct the information stream. Systrends **T²App** is an add-on to our comprehensive **T²Enterprise** data integration product line and is always used with **T²Tran**.

Businesses today need to share information simply and quickly. Managing the delivery of data from various sources to a variety of end users is challenging. **T²App** securely manages the flow of information to any mobile device. Systrends has helped over 200 companies in the energy industry automate, track, and transform their data. How can we help you?

Save time, money, and reduce the potential of manual errors.

T²App features include:

- Management of the flow of information to mobile devices using APIs
- Management, storage, and conversion of data for distribution
- Administration of data from its source to its delivery
- Transport of data across the Internet
- Customized scalability for your data management and distribution

T²Enterprise, our premier data integration product, includes **T²CIS** (provides complete customer and billing system functionality), **T²Com** (manages data between trading partners and between internal data solutions), **T²Tran** (validates, stores, alerts, and reports all transactions), **T²App** (provides delivery of data to mobile devices), and **T²Map** (provides system data integration for complex data streams). **T²Enterprise** is a comprehensive end-to-end solution for any organization that wants to manage, track, store, and distribute its data.

Let T²Enterprise take your organization's transaction management to the next power.
