

T²Enterprise

Manage all current and future data integration requirements with one software solution.

Systrends **T²Enterprise** application is a complete solution for your data integration needs. The software suite is designed to manage all components of complex data streams, from mapping and data control to distribution and auditing. **T²Enterprise** provides a dynamic solution for your organization’s data translation, storage, and distribution needs.

With IT departments overburdened, electronic data flow increasing, and the need to manage and share more information growing, it’s time to look at ways to automate, track, aggregate, and distribute. Systrends has helped over 200 companies in the energy industry automate, track, and transform their data. Our **T²Enterprise** is the premier application for data discovery, integration, and monitoring. How can we help you?

Our suite of products includes: **T²CIS** (provides complete customer and billing system functionality); **T²Com** (manages data between trading partners and between internal data solutions); and **T²Tran** (validates, stores, alerts, and reports all transactions); **T²Enterprise** is a comprehensive end-to-end solution for any organization that wants to manage, track, store, and distribute its data. **T²Enterprise** CIS, communication, and transaction management components manage and maintain your organization’s data components and integration .

T²Enterprise features include:

- Transaction management, security, and validation
- Drag and drop control for quick and easy mapping
- Flexible data conversion, storage, and reporting
- Data transformation services
