

T²Tran

Use a transactional database to make auditing, reporting, and redistributing data easier.

T²Tran is a transactional database designed to store, analyze, report, validate, and archive data. This database solution provides controlled business processes and integration functions to standardize data for other uses. **T²Tran** transforms and stores data from proprietary systems so it can be easily used for reporting or redistribution to other data sources.

Developed as the first module to support **T²Com**, **T²Tran** has a proven track record of effectively storing, validating, and reporting data. Systrends **T²Tran** is an add-on to our comprehensive **T²Enterprise** data integration product line and is always used in conjunction with **T²Com**.

Businesses today need solutions that are flexible and allow data to be shared. Data retrieval and reporting from various system sources can be time consuming and difficult. **T²Tran** minimizes risk and provides easy access to data, reducing the effort and cost of inaccurate and inefficient data storage and retrieval. Systrends has helped over 200 companies in the energy industry automate, track, and transform their data. How can we help you?

Save time, money, and allow easier access to data.

T²Tran features include:

- Transaction management and validation
- Business process controls and integration functions
- Standardized transaction transformation and mapping to a transactional database
- Transaction translation and acknowledgement generation
- Standardized and custom reports
- Customized scalability for your data storage and retrieval

T²Enterprise, our premier data integration product, includes **T²CIS** (provides complete customer and billing system functionality), **T²Com** (manages data between trading partners and between internal data solutions), **T²Tran** (validates, stores, alerts, and reports all transactions), **T²App** (provides delivery of data to mobile devices), and **T²Map** (provides system data integration for complex data streams). **T²Enterprise** is a comprehensive end-to-end solution for any organization that wants to manage, track, store, and distribute its data.

Let **T²Enterprise** take your organization's transaction management to the next power.
