

eTariffApp

Track FERC Tariffs on your iPad

Systrends **eTariffApp** is an application available at the Apple App Store for use on the iPad. **eTariffApp** uses features from related Systrends eTariff products and Systrends **T²Enterprise** to send tariff documents from Systrends eTariffManager software directly to your iPad. **eTariffApp** stores user-defined company tariffs in a library and retrieves updates as required. Configuration options provide easy updates, bookmarking, and a history of any selected tariff. Properties and related items display the relationship between dockets, filings, and tariffs. **eTariffApp** is the simplest way to search, view, and track any tariffs filed with FERC.

eTariffApp features include:

- Company library
- Tariff Library
- User selection of companies
- User selection of tariffs
- Bookmarked pages for quick retrieval
- Document tab to display entire tariff
- Properties tab to display tariff name, description, effective date, and version

Along with our **eTariffApp**, Systrends eTariff products include **eTariffManager** (converts energy tariffs to XML and provides comprehensive tariff management) and three optional add-on applications to support your tariff management needs: **eTariffLoader** (imports previously filed XML into eTariffManager); **eTariffWeb** (transfers tariff documents from eTariffManager to a company content management system or public website); and **eTariffCompliance** (provides a full-featured Governance Risk Compliance system for impact analysis). Systrends makes sure our software products comply with changing FERC requirements. Other software offerings based on FERC filing requirements include: **eFile549** (converts spreadsheets to XML and PDF for 549D filings); and **eFileEQR** (converts quarterly report spreadsheets to FERC-defined EQR XML). Coming soon will be new software for FERCs Form 1 and Q3 reporting which will be changing to XML.

Systrends **eTariffManager** is an all-inclusive tariff management software solution that generates FERC-defined XML in a stand-alone or hosted environment. **eTariffManager** provides full-circle management for the lifespan of the tariff. Systrends provides service options that allow you to pay based on the number of filings or unlimited filings). Regardless of the size of your company or tariff, **eTariffManager** is the ideal solution for your tariff filing needs; Systrends is committed to expanding its features based on customer requirements and strives to provide the best tariff filing software available. How can we help you with your tariff management?

Let **eTariffManager** guide you through the tariff management process.
