

eTariffLoader

Easily Upload, Edit, and Manage Previously-Filed XMLs

Systrends **eTariffLoader** is a feature in our **eTariffManager** software that uploads previously-submitted XML files from other tariff software or FERC's eTariff Viewer. **eTariffLoader** allows subsequent filings to be created based on a tariff that has already been filed with FERC by loading all the previously submitted metadata and documents from past filings.

eTariffLoader features include:

- XML easily uploaded from eTariff Viewer or third party software
- Validation of XML data and schema
- Verification of duplicate filing ID and tariff ID
- Incorporated filing properties including title, ID, and filing type
- Integrated section documents including meta data and outline
- Attachments included from third party XML
- Effective, accepted, suspended, and pending filings from FERC all included in one upload

Along with our **eTariffLoader** feature, **eTariffManager** has three other optional add-on applications to support your tariff management needs: **eTariffWeb** (transfers tariff documents from eTariffManager to a company content management system or public website); **eTariffCompliance** (provides a full-featured Governance Risk Compliance system for impact analysis); and **eTariffApp** (sends tariff documents directly from FERC's eTariff Viewer to an iPad). Systrends makes sure our software products comply with changing FERC requirements. Other software offerings based on FERC filing requirements include: **eFile549** (converts spreadsheets to XML and PDF for 549D filings); and **eFileEQR** (converts quarterly report spreadsheets to FERC-defined EQR XML). Coming soon will be new software for FERCs Form 1 and Q3 reporting which will be changing to XML .

Systrends **eTariffManager** is an all-inclusive tariff management software solution that generates FERC-defined XML in a stand-alone or hosted environment. **eTariffManager** provides full-circle management for the lifespan of the tariff. Systrends provides service options that allow you to pay based on the number of filings or unlimited filings). Regardless of the size of your company or tariff, **eTariffManager** is the ideal solution for your tariff filing needs; Systrends is committed to expanding its features based on customer requirements and strives to provide the best tariff filing software available.

Let **eTariffManager** guide you through the tariff management process.
