# eTariffManager

Create, Manage, and Update Multiple Tariffs with One Solution

Systrends **eTariffManager** is an all-inclusive tariff management software solution that generates FERC-defined XML in a stand-alone or hosted environment. **eTariffManager** provides full-circle management for the lifespan of the tariff. Systrends provides service options that allow you to pay based on the number of filings or unlimited filings). Regardless of the size of your company or tariff, **eTariffManager** is the ideal solution for your tariff filing needs; Systrends is committed to expanding its features based on customer needs and strives to provide the best tariff filing software available.

How can we help you with your tariff management?

eTariffManager

Master Tariff	Filings	Attachments	Issuances
Tariff Library	Filing Library	Multiple document format	Manage Dockets
Tariff maintenance	Upload Word, PDF, RTF	FERC-defined attachments	Manage Orders
Generate in PDF, Word, RTF	Pre-loaded filing types	Auto-create clean & marked	Associate to filing

eTariff Manager offers three different service options: The License Purchase option allows companies to install the software onsite, or have it hosted by Systrends, and generate unlimited filings for one price. The Pay-per-Use option is a web-based solution, hosted by Systrends, that allows users to log into their own private site to create, edit, and manage tariffs and XML's for submission to FERC; you only pay for the filings generated each month. Lastly, there is the Pay-per-Filing option where Systrends creates the FERC-defined XML from your tariff documents and sends the it back to you for submission; you pay for the preparation of each filing.

eTariff Manager software features include:

- Tariff Documents accepted in Word, PDF, TXT, or RTF format
- Multiple company and multiple user capability
- Advanced report search and display capability
- Filing library and Master Tariff library - sorting and archival
- All accepted filings and sections auto-merged into their respective Master Tariff
- Order and Docket tracking and reporting
- Subscription-based email alerts, workflow queue, and user controls

eTariffManager has four optional add-on applications to support your tariff management needs: **eTariff Loader** (imports previously-filed XML packages into eTariffManager); **eTariffWeb** (transfers tariff documents from eTariff-Manager to a company content management system or public website); **eTariffCompliance** (provides a full-featured Governance Risk Compliance system for impact analysis); and **eTariffApp** (sends tariff documents directly from FERC's eTariff Viewer to an iPad). Systrends makes sure our software products comply with changing FERC requirements. Other software offerings based on FERC filing requirements include: **eFile549** (converts spreadsheets to XML and PDF for 549D filings); and **eFileEQR** (converts quarterly report spreadsheets to FERC-defined EQR XML). Coming soon will be new software for FERCs Form 1 and Q3 reporting which will be changing to XML

Let eTariffManager guide you through the tariff management process.
